

## My Family Feast

Dear Parents,

Your child's next authentic task (project) will be titled, "My Family Feast". Our goal for this project is for your child to understand the process for planning a large family dinner. This project supports many learning objectives in healthful living and technology. A first grade objective for healthful living is (objective 5.2) - "Select healthful foods for teeth and body from the food guide pyramid." One of the social studies and technology objectives is (objective 7.03) - "Use the computer and other technological tools to gather, organize, and display data."

The good news is we will be completing most of this project at school. We will be integrating technology by having them plan and create a PowerPoint slideshow. They will include a slide about the foods they will eat, their grocery list, and a description of a fall cultural tradition. They will present their completed slide shows to the class.

Please provide some information to help complete this project at school. We want to highlight the cultural differences in our classrooms. Please help your child brainstorm 5 foods you might have at a family feast.

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_
4. \_\_\_\_\_
5. \_\_\_\_\_

We would also like your child to make a guest list for their pretend feast.  
(No more than 8 guests)
