The Little Snowman

The little snowman
wanted to play...

So he asked the
moose if he could
play today.

“Not now” said the
Moose, “maybe later
in the day”.

Next, he asked the
polar bear if he
could play today.

“Not now” said the polar bear, “maybe later in the day”.

Next, he asked the
dog if he could play
today.

“Not now” said the dog, “maybe later in the day”.

Next, he asked the
penguin if he could
play today.

Not now!

“Not now” said the penguin, “maybe later in the day”.

The sun came out
and all the animals
came to play.

But the little
snowman had gone
away.

The little snowman
wanted to play...

So he asked the moose
if he could play today.

“Not now” said the Moose,
“maybe later in the day”.

So he asked the polar bear
if he could play today.

“Not now” said the polar bear, “maybe later in the day”.

So he asked the dog if he could play today.

“Not now” said the dog, “maybe later in the day”.

So he asked the penguin if he could play today.

“Not now” said the penguin,
“maybe later in the day”.

The sun came out and all
the animals came to play.

But the little snowman
had gone away.

The End

Not now!

Name: _____

Would you play with the snowman?

Draw a picture of you playing with the snowman.

Write about your day.

Roll a Snowman

To play the game, you will need the Snowman mat, 2 dice, counters or markers in two colors (Laminating the board and using wipe off markers to mark spaces works well). The first player rolls the dice and adds them together to find the sum. Cover that number on the mat with a marker. The next player rolls the dice and adds the numbers together. If you roll a number that has already been covered, you lose your turn. Keep playing until all numbers are covered. The player with the most numbers covered wins!

Snowman Estimation

Use the sheet to estimate how many snowballs will fit on each snowman. Once you have written your guess, use the snowballs to see how many actual snowball fit on each snowman. Write about your findings when you are through. Note: You can use mini marshmallows, cotton balls, white jelly beans, or any other item for estimation.

Snowman Estimation #1

Snowman Estimation #2

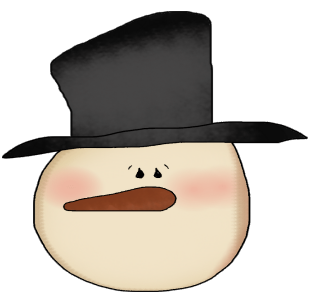

Snowman Estimation #3

Name: _____

Snowman Estimation: Part 1

Snowman	Prediction	Actual
<p data-bbox="105 493 527 577">Snowman #1</p> 		
<p data-bbox="105 976 527 1060">Snowman #2</p> 		
<p data-bbox="105 1512 527 1596">Snowman #3</p> 		

Name: _____

Snowman Estimation: Part 2

Write at least one sentence about your investigation of estimation.

Name: _____

Snowman Estimation: Part 2

Write at least one sentence about your investigation of estimation.

Name: _____

Steps to Build a Snowman

Describe how you would build a snowman.

Draw a picture for each step.

Write a sentence to explain your steps.

Name: _____

Steps to Build a Snowman

Describe how you would build a snowman.

Draw a picture for each step.

Write a sentence to explain your steps.

Name: _____

Cut out the pictures and put them in order.

Snowman Fact Families

Directions: Match the fact family addition and subtraction snowflakes to the correct snowman to solve the problems. Next create your own fact family addition and subtraction problems.
